

Easy English Words Flashcards

11 Flashcards

50 Awesome words for KIDS

How to Use This Book

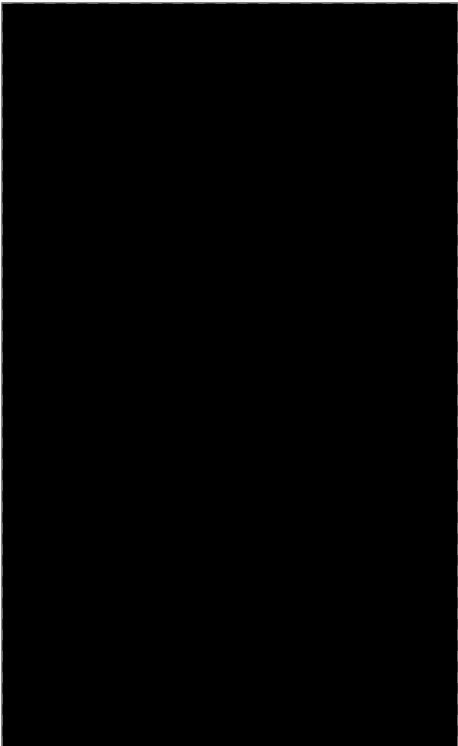

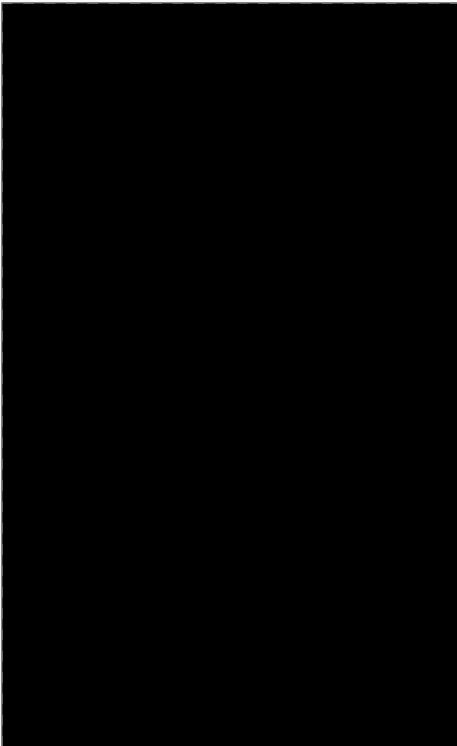

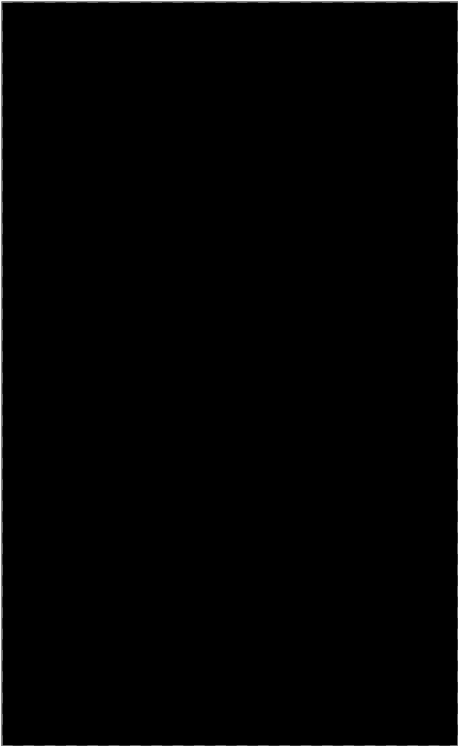

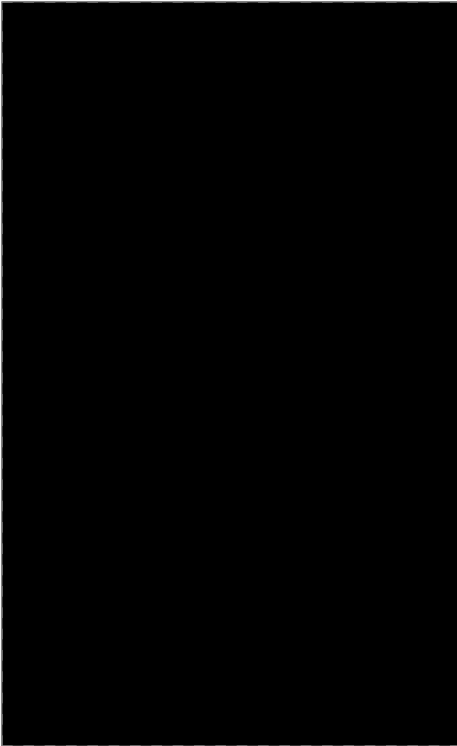

1. Cut along the dotted lines to separate each flashcard.
2. Each card has a question/term on the FRONT and answer on the BACK.
3. For best results, use scissors or a paper cutter.
4. Optional: Laminate cards for durability.
5. Store cards in a box or use a ring to keep them together.

Study Tips:

- * Review cards daily for best retention
- * Shuffle cards to avoid memorizing order
- * Create piles: "Know", "Learning", "Review"
- * Test yourself or study with a partner

This book contains 11 flashcards designed for effective learning.

[cut here]

BACK

That's outer space! It's a vast, almost empty area containing galaxies, stars, and planets. It's very cold and has almost no air.

BACK

Its YOU, the one, a person and anything.

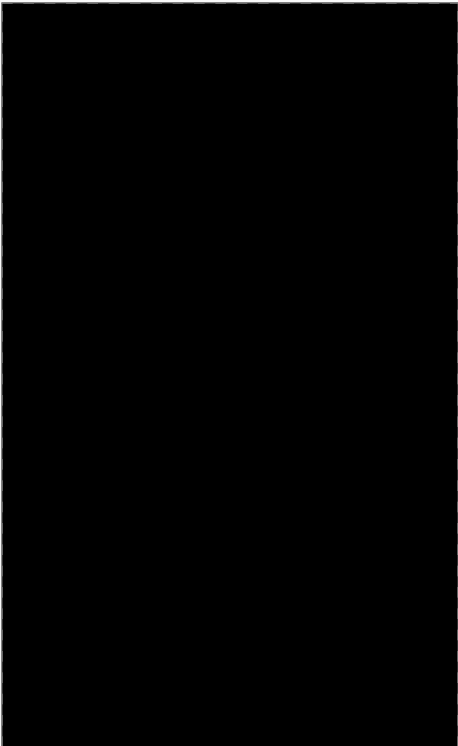

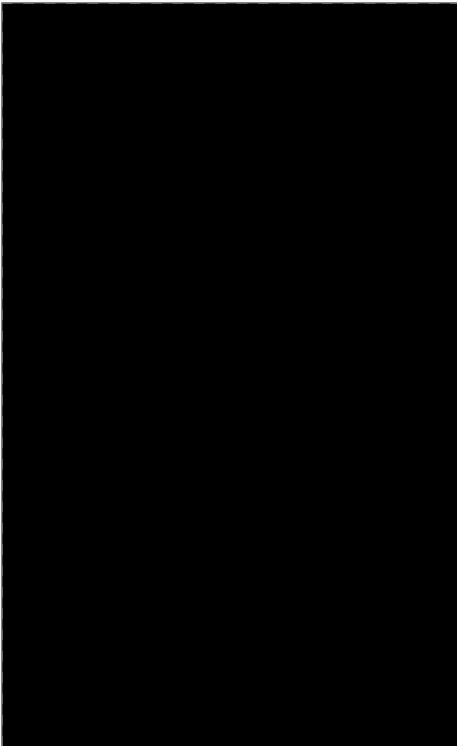

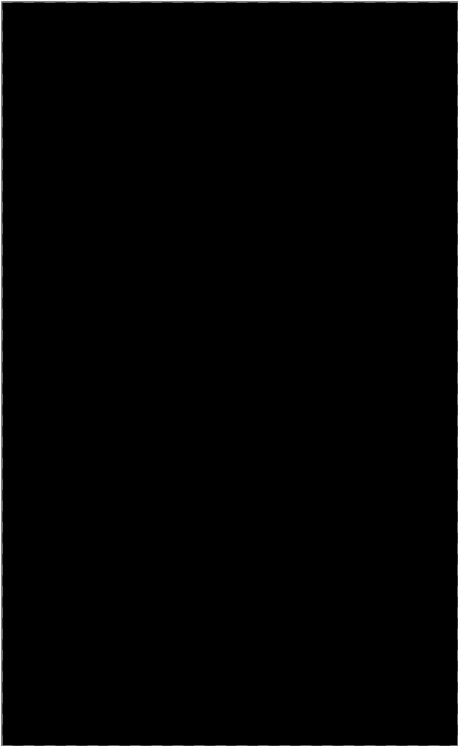

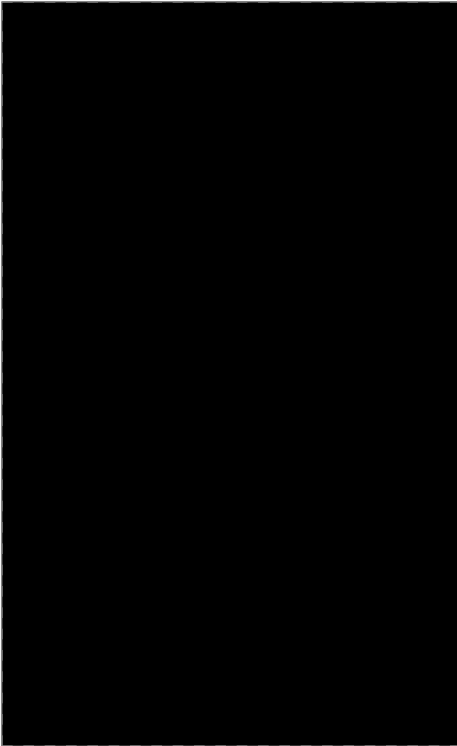

BACK

A constellation! For example, the Big Dipper is a famous constellation. People use constellations to navigate and tell stories.

BACK

A moon! Earth has one moon, but other planets have many. Moons are natural satellites that travel around planets.

[cut here]

BACK

A planet is a large object that orbits a star. Earth is a planet that orbits the sun. Planets can be rocky or made of gas.

BACK

A star! Our sun is a star. Stars produce light and heat through nuclear reactions.

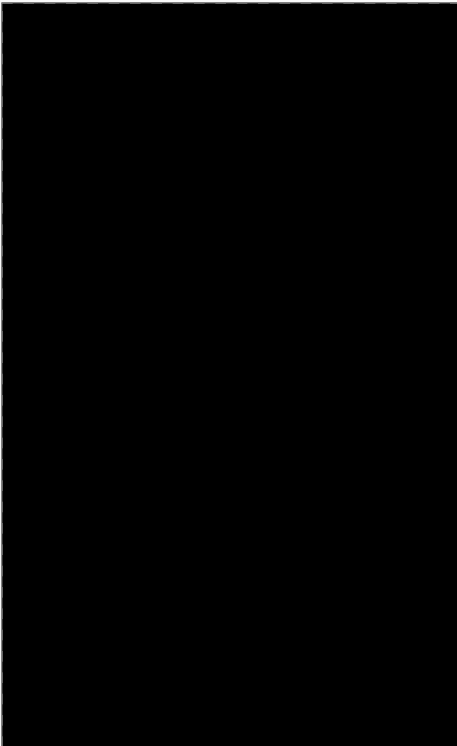

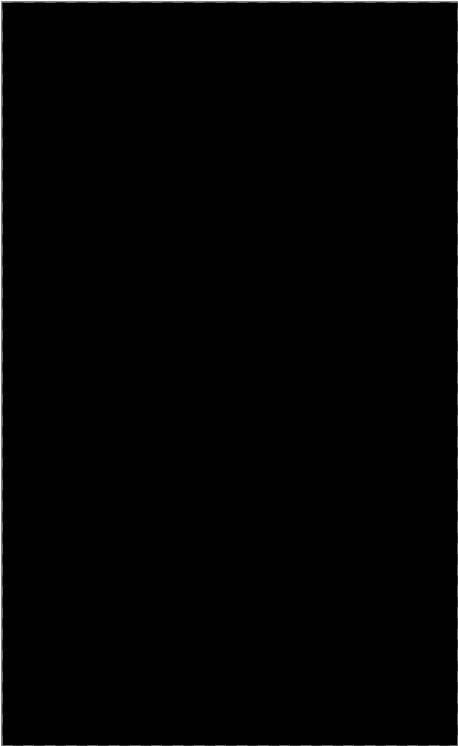

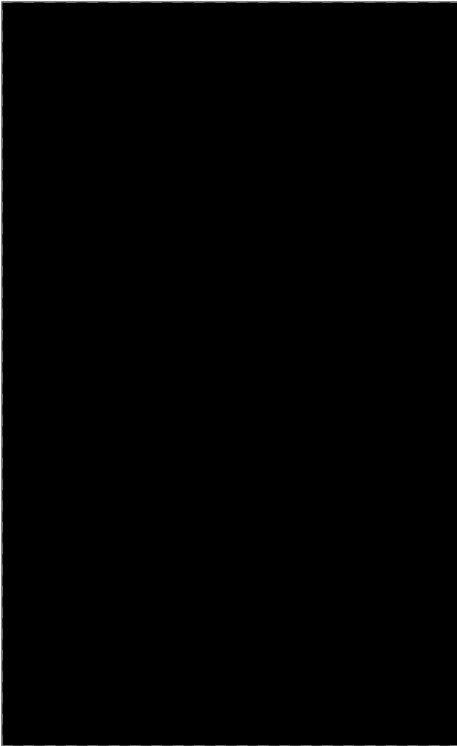

BACK

An astronaut is a person trained to travel and work in space. They study space and conduct experiments. Astronauts wear special suits to survive in space.

BACK

A spaceship is a vehicle used to travel into outer space. Spaceships can carry astronauts and equipment. Rockets are often used to launch spaceships.

[cut here]

BACK

Earth's atmosphere! It's a layer of gases surrounding our planet. The atmosphere also allows us to breathe and keeps Earth warm.

BACK

The Milky Way! It's a huge spiral galaxy containing billions of stars. Our solar system is just one small part of the Milky Way.

BACK

A telescope is an instrument used to see distant objects in space. Telescopes make faraway stars and planets appear closer and brighter. They help us learn about the universe.
