Choose the best answer for each multiple-choice question. Good luck!

Name: _____

Date: _____

Score: _____ / 3

Science Quiz

1

Which of the following is NOT a primary color of light?

- ☐ A) Red
- ☐ B) Blue
- ☐ C) Green
- ☐ D) Yellow

2

What does the acronym 'GPS' stand for?

- ☐ A) Global Positioning System
- ☐ B) General Positioning Satellite
- ☐ C) Geographic Positioning System
- ☐ D) Global Propulsion System

3

What is the name for the process by which plants convert light energy into chemical energy?

- ☐ A) Respiration
- ☐ B) Photosynthesis
- ☐ C) Transpiration
- ☐ D) Oxidation

What famous scientist developed the theory of general relativity?

ANSWER KEY

Science Quiz

1

D) Yellow

Yellow is a secondary color of light, created by combining red and green light. The primary colors of light are red, green, and blue (RGB).

2

A) Global Positioning System

GPS stands for Global Positioning System, a satellite-based navigation system that provides location and time information anywhere on or near the Earth where there is an unobstructed line of sight to four or more GPS satellites.

3

B) Photosynthesis

Photosynthesis is the process used by plants and other organisms to convert light energy into chemical energy that can later be released to fuel the organisms' activities. This chemical energy is stored in carbohydrate molecules, such as sugars, which are synthesized from carbon dioxide and water.

BONUS ANSWER:

Albert Einstein
