ANSWER KEY

Science Knowledge Test

1

B) Photosynthesis

Photosynthesis is the process where plants use sunlight, water, and carbon dioxide to create sugars (food) and oxygen.

2

True

The Earth's orbit around the Sun defines a year.

3

C) Solar Power

Solar power is a renewable energy source because it is derived from sunlight, which is constantly replenished.

4

C) Constellation

A constellation is a group of stars forming a recognizable pattern that is traditionally named after its apparent form or identified with a mythological figure.

5

True

This statement describes the Law of Conservation of Mass.
